### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The prior art of record does not teach or suggest a method of assembling a car body by spot welding in which a transfer system moves a plurality of joisted-locating jigs transversely across a car body transfer line that extends above the fixed frames. Further prior art to Vogt et al. (U.S. Patent No. 6,170,732) teaches in column 4, line 41 – column 6, line 3 (see Figures 1, 6) a method of assembling a car body by spot welding, however, again is missing a transfer system moves a plurality of joisted-locating jigs transversely across a car body transfer line that extends above the fixed frames from a first stock position to the fixed frames and then onto another different stock position opposite the first stock position with the stock positions being outside the fixed frames and the car body transfer line. Similarly, prior art to Ray (U.S. Patent No. 5,943,768) teaches a method of assembling a car body by spot welding with a transfer system moving a plurality of joisted-locating jigs transversely across a car body transfer line that extends below the fixed frames and the fixed frames (36) move with the plurality of joisted jigs (38) and not from a first stock position to the fixed frames and then onto another different stock position opposite the first stock position. Kozai (Japanese Publication No. JP 62110580A) teaches a transfer line extending above the fixed frame, however, the transfer line moves a plurality of joisted-locating jigs along a car body transfer line not transversely across a car body transfer line from a first stock position to the fixed frames and then onto another different stock position opposite the first stock position.

Therefore, allowance of claims 1-7 is indicated because the prior art of record does not show or fairly suggest a method of assembling a car body by spot welding in which a transfer system moves a plurality of joisted-locating jigs transversely across a car body transfer line that extends above the fixed frames from a first stock position to the fixed frames and then onto another different stock position opposite the first stock position with the stock positions being outside the fixed frames and the car body transfer line in combination with the structural elements/orientation and method steps recited in at least claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
